

JAYASREE MURUGESAN

Data Analyst | SQL | Python | Power BI | ETL/ELT | Data Visualization

Chennai, Tamil Nadu | 8248946539 | jayasreemjayasreem@gmail.com | linkedin.com/in/jayasree-m01

PROFESSIONAL SUMMARY

Results-driven Data Analyst with hands-on experience in SQL, Python, and Power BI, specializing in ETL/ELT pipeline development, data cleaning, and interactive dashboard design. Proficient in writing complex SQL queries (JOINS, CTEs, Window Functions) and building Power BI reports with DAX and data modeling. Completed multiple end-to-end projects analyzing 10,000+ records to deliver actionable business insights. Passionate about data-driven decision-making and continuously upskilling in cloud data platforms and AI-assisted analytics.

TECHNICAL SKILLS

- Databases: SQL, MySQL — Joins, Aggregations, CTEs, Subqueries, Window Functions, Query Optimization
- Data Visualization: Power BI, Tableau — DAX, Data Modeling, Dashboard Design, KPI Reporting
- Data Engineering: ETL/ELT pipeline development — Extract, Transform, Load; Incremental Load concepts
- Programming: Python (Pandas, NumPy) — data cleaning, EDA, automation
- Tools: Microsoft Excel (Advanced), Power Query
- Analytics: Data Cleaning, Exploratory Data Analysis (EDA), KPI Reporting, Business Intelligence
- Concepts: Data Modeling, Data Quality, Data Governance basics, Agile methodology

PROJECTS

Food Delivery Data Analysis | SQL, Power BI

- Built ETL pipeline — extracted multi-table datasets (customers, orders, restaurants, cities), transformed using advanced SQL (JOINS, CTEs, window functions), and loaded into Power BI for reporting
- Identified top-performing restaurants contributing to a significant portion of total revenue through structured data analysis
- Performed time-series trend analysis on order patterns to identify peak business hours
- Built interactive Power BI dashboards with DAX measures and data modeling to visualize revenue trends and customer behavior
- Delivered actionable insights supporting revenue optimization and targeted marketing strategies

Fraud Transaction Analysis | SQL, Power BI

- Designed ETL pipeline to ingest, transform, and validate 10,000+ financial transaction records using SQL aggregations and window functions
- Applied incremental data updates — inserting only new transaction records to maintain dashboard accuracy
- Identified high-risk transactions based on abnormal frequency and value patterns; ensured data quality and consistency
- Developed Power BI dashboards to monitor fraud trends, risk distribution, and KPI reporting for stakeholder review

HR Analytics Dashboard | Power BI, Excel

- Performed end-to-end ETL — extracted employee data, transformed using Power Query (handling nulls, duplicates, standardizing formats), loaded into Power BI
- Developed interactive dashboards tracking KPIs: attrition rate, salary trends, employee tenure, and department-level metrics
- Identified high-attrition departments to highlight key retention challenges for HR decision-making
- Delivered stakeholder-ready visual reports demonstrating clear communication and business insight

College Bus Management System | PHP, MySQL

- Designed and maintained a relational database (MySQL) for students, routes, and drivers — reinforcing data modeling and SQL fundamentals

- Built a structured web-based system to manage and query data, improving data organization and accessibility

PROFESSIONAL DEVELOPMENT / JOB SIMULATIONS

Deloitte Australia Data Analytics Job Simulation | Forage

June 2026

- Completed a virtual job simulation with Deloitte Australia focused on data analysis and forensic technology
- Created a data dashboard using Tableau to visualize findings and support investigative analysis
- Used Excel to classify data and draw business conclusions for stakeholder decision-making

EDUCATION

Bachelor of Computer Applications (BCA)

2019 - 2022

Kongu Arts and Science College | CGPA: 8.5

CERTIFICATIONS

- SQL (Basic) Certification — HackerRank (2026)
- SQL and Database Design — Scalar (2025)
- SQL and Relational Databases — IBM (2025)
- Python for Data Science — IBM (2025)
- Python Programming — Udemy (2025)

KEY COMPETENCIES

- Strong analytical and problem-solving mindset
- ETL pipeline thinking — translating raw data into business insights
- Data-driven decision-making
- Effective stakeholder communication and reporting
- Quick learner with adaptability to new tools and technologies
- Cross-functional team collaboration
- Curiosity to explore new data solutions and continuous learning orientation
