PROFESSIONAL SUMMARY

Data Analyst with hands-on experience in SQL, Python, Power BI, Snowflake, Microsoft Fabric, and Excel, specializing in ETL/ELT workflows, dashboard development, and business intelligence reporting. Built end-to-end analytics projects across Retail, Food Delivery, Banking, and HR domains, turning raw data into actionable, KPI-driven insights.

TECHNICAL SKILLS

- Databases: SQL, MySQL, Snowflake — Joins, Aggregations, CTEs, Subqueries, Window Functions, Query Optimization
- Data Visualization: Power BI, Tableau — DAX, Data Modeling, Dashboard Design, KPI Reporting
- Data Engineering: Microsoft Fabric (Lakehouse, Dataflows Gen2, Pipelines), ETL/ELT (SQL, Snowflake) — Extract, Transform, Load
- Programming: Python (Pandas, NumPy) — data cleaning, EDA, automation
- Tools: Microsoft Excel (Advanced), Power Query
- Analytics: Data Cleaning, Exploratory Data Analysis (EDA), KPI Reporting, Business Intelligence
- Concepts: Data Modeling, Data Quality, Data Governance basics, Agile methodology

INTERNSHIP EXPERIENCE

Data Analyst Intern | RaushByte Technologies

Jul 2026 – Aug 2026

- Performed data analysis, report preparation, and dashboard creation across practical project assignments
- Built data visualizations and analytical reports to support business decision-making, applying industry-oriented data analytics concepts
- Demonstrated strong analytical thinking, communication, and problem-solving skills, earning recognition for dedication and initiative

PROJECTS

RetailX – Microsoft Fabric Retail Analytics | Microsoft Fabric, Power BI, SQL, DAX

- Built an end-to-end analytics solution using Microsoft Fabric and Power BI to process 50,000+ retail orders, designing a Bronze → Silver → Gold Lakehouse architecture with ETL workflows in Dataflows Gen2 and Pipelines
- Created a star-schema semantic model and DAX measures, and built Power BI dashboards covering sales, products, stores, inventory, and customer feedback
- Implemented RLS, data validation, Direct Lake, and DEV → TEST → PROD deployment pipelines for production-grade delivery

Food Delivery Business Intelligence Dashboard | SQL, Snowflake, Power BI

- Engineered an end-to-end ETL pipeline in Snowflake and wrote advanced SQL (JOINS, CTEs, window functions) to analyze 36,000+ orders across 200 customers and 30 restaurants, tracking ₹3.16M in revenue
- Segmented customers into Low, High, and VIP tiers and built an interactive Power BI dashboard with DAX measures to track revenue trends and top-performing restaurants across 5 city markets

Bank Customer Churn Analytics | SQL, Power BI, Excel

- Analyzed 10,000+ customer records spanning \$765M in account balances to uncover churn drivers across demographics, credit score, tenure, and balance
- Built an interactive Power BI dashboard with DAX-driven KPI cards revealing a 20% churn rate, and a customer-level risk-scoring view to drive retention recommendations

Employee Attrition Analytics Dashboard | Power BI, Excel

- Cleaned and transformed workforce data for 1,470 employees in Power Query, then built a Power BI dashboard surfacing a 16.1% attrition rate (237 exits)
- Identified key attrition drivers — Life Sciences staff, low satisfaction, frequent travelers, and overtime-working entry-level hires — pinpointing the 26–35 age group as highest-risk

College Bus Management System | PHP, MySQL

- Designed and maintained a relational database (MySQL) for students, routes, and drivers — reinforcing data modeling and SQL fundamentals
- Built a structured web-based system to manage and query data, improving data organization and accessibility

PROFESSIONAL DEVELOPMENT

Deloitte Australia Data Analytics Job Simulation | Forage, June 2026

- Completed a virtual job simulation focused on data analysis and forensic technology; built a Tableau dashboard and used Excel to classify data and draw business conclusions

EDUCATION

Bachelor of Computer Applications (BCA)

Kongu Arts and Science College | CGPA: 8.5

CERTIFICATIONS

SQL (Basic) — HackerRank (2026) | Python for Data Science — IBM (2025) | Python & Relational Databases — IBM (2025) | SQL & Database Design — Scalar (2025) | Python Programming — Udemy (2025)

KEY COMPETENCIES

Analytical problem-solving • Data-driven decision-making • Stakeholder communication • Quick learner • Cross-functional collaboration
